

# GUÍA RÁPIDA DE LA PLATAFORMA NBER

Ofrece investigaciones económicas y divulga los resultados de investigaciones entre académicos, responsables de políticas públicas y profesionales de negocios. Los investigadores afiliados a NBER estudian una amplia gama de temas y emplean muchos métodos diferentes en su trabajo. Las áreas temáticas incluyen nuevas mediciones estadísticas, estimación de modelos cuantitativos de comportamiento económico y análisis de los efectos de las políticas públicas.

# PASOS PARA UTILIZAR LA LA PLATAFORMA NBER

## Paso #1

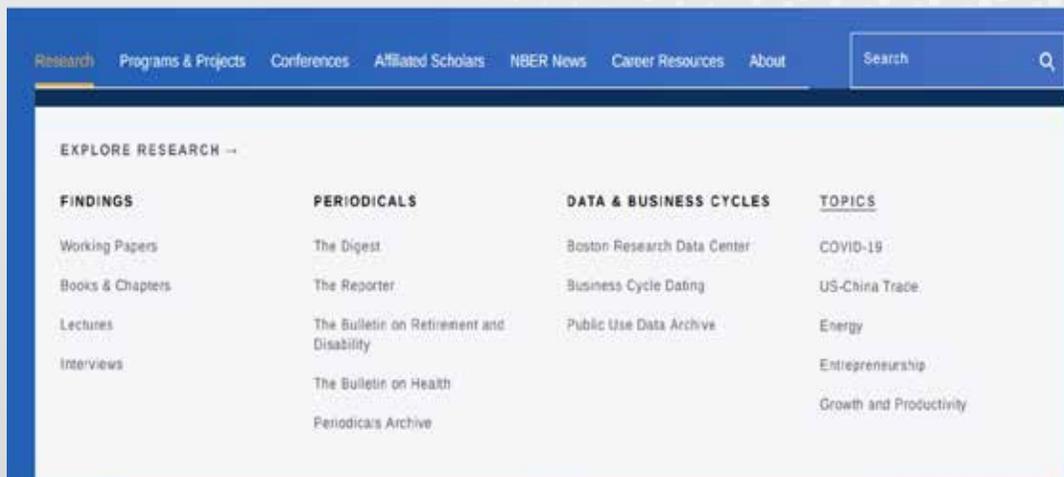

Ingresa a la página principal de NBER

## Paso #2

Explore las distintas secciones en las cuáles puede realizar búsquedas

### 1. Investigación

## 2. Programas y proyectos

The screenshot shows the 'Programs & Projects' section of the NBER website. The navigation bar includes 'Research', 'Programs & Projects', 'Conferences', 'Affiliated Scholars', 'NBER News', 'Career Resources', and 'About', along with a search box. The main content is organized into three columns: 'PROGRAMS', 'WORKING GROUPS', and 'PROJECTS & CENTERS'. Each column lists various research areas and initiatives.

PROGRAMS	WORKING GROUPS	PROJECTS & CENTERS
Economics of Aging	Behavioral Finance	Center for Aging and Health Research
Asset Pricing	Chinese Economy	Conference on Econometrics and Mathematical Economics
Children	Cohort Studies	Conference on Research in Income and Wealth
Corporate Finance	Economics of Crime	Economics of Digitization
Development Economics	Entrepreneurship	Gender in the Economy Study Group
Development of the American Economy	Household Finance	Illinois Workplace Wellness
Economic Fluctuations and Growth	Innovation Policy	Improving Health Outcomes for an Aging Population
Economics of Education	Insurance	Macroeconomics Annual
Environment and Energy Economics	Market Design	Measuring the Clinical and Economic Outcomes Associated with Delivery Systems
Health Care	Organizational Economics	Oregon Health Insurance Experiment
Health Economics	Personnel Economics	Retirement and Disability Research Center
Industrial Organization	Race and Stratification in the Economy	The Roybal Center for Behavior Change in Health
International Finance and Macroeconomics	Risks of Financial Institutions	
International Trade and Investment	Urban Economics	

## 3. Conferencias

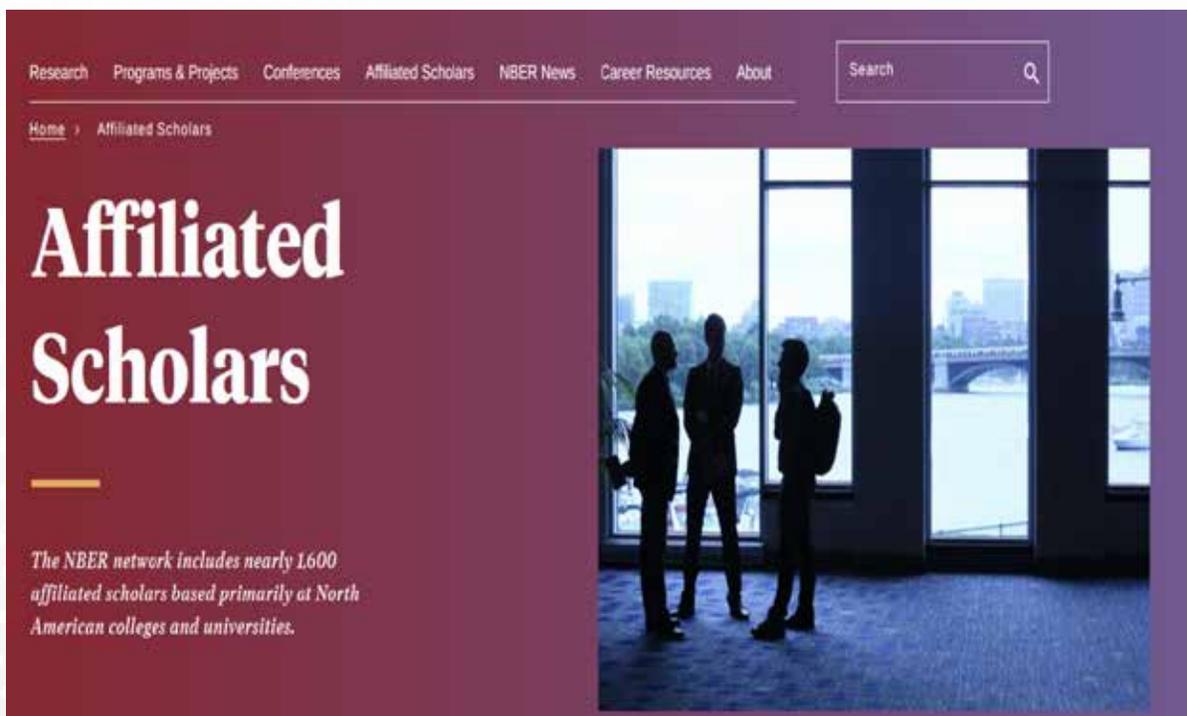

The screenshot shows the 'Conferences' page on the NBER website. The navigation bar is identical to the previous page. The page features a large heading 'Conferences' and a descriptive paragraph. To the right, there is a photograph of a conference session with four participants seated around a table. Below the photo, the names and affiliations of the participants are listed.

**Conferences**

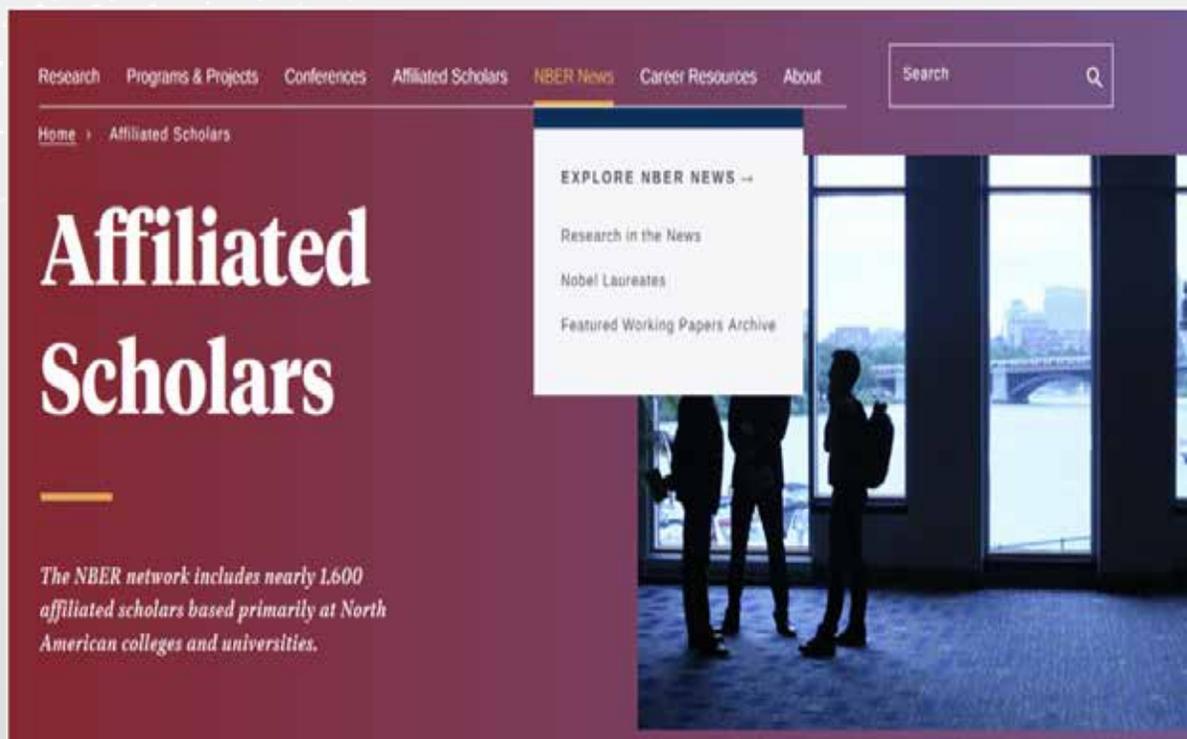

*The NBER convenes over 120 meetings each year at which researchers share and discuss their latest findings and launch new projects. The Summer Institute, a collection of nearly 50 smaller meetings, is held annually in July.*

*Kala Krishna of Pennsylvania State University, Douglas Irwin of Dartmouth College, M. Scott Taylor of the University of Calgary, and John McLaren of the University of Virginia*

# Paso #3

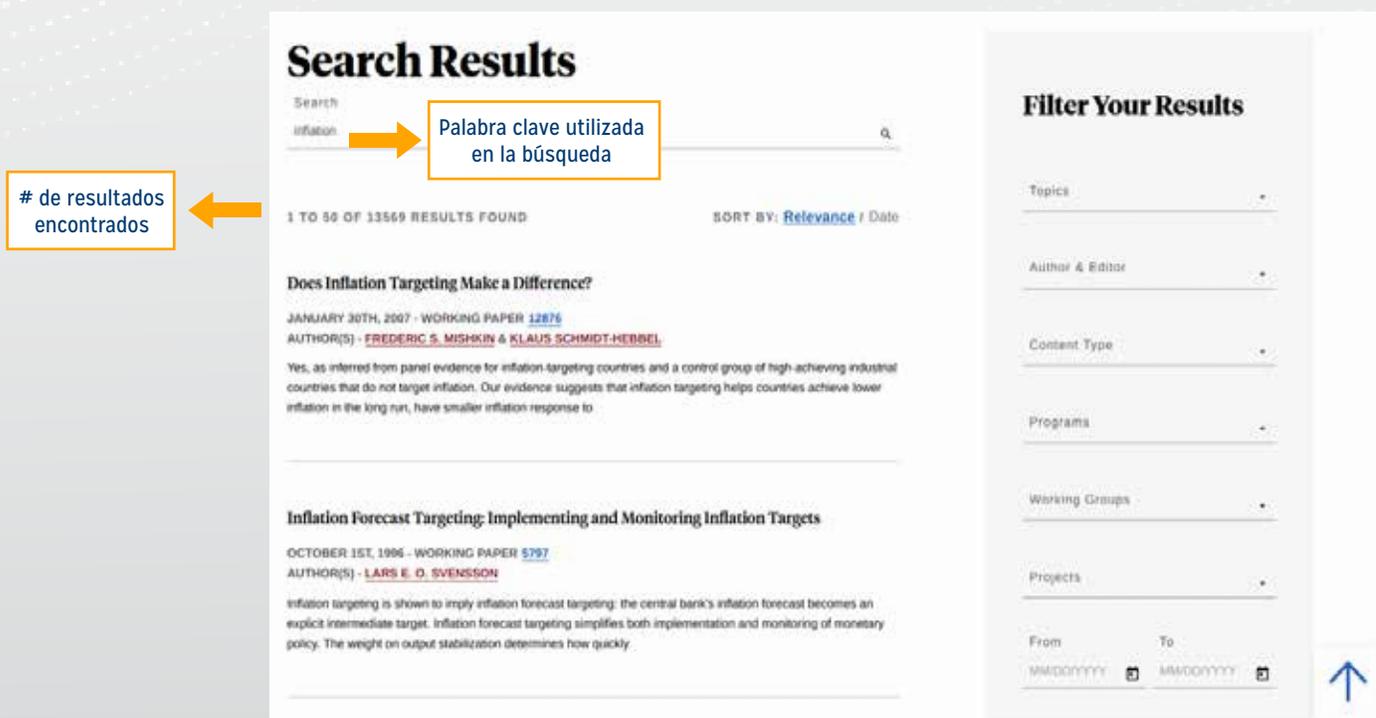

Realización de búsqueda utilizando la barra de búsqueda principal

The screenshot shows the NBER website homepage. At the top, there is a navigation bar with links for 'Subscribe', 'Media', and 'Open Calls'. Below this is a secondary navigation bar with links for 'Research', 'Programs & Projects', 'Conferences', 'Affiliated Scholars', 'NBER News', 'Career Resources', and 'About'. A search bar is located in the top right corner, with a magnifying glass icon and the word 'Search' inside. An orange arrow points to this search bar from a callout box on the right that says 'Barra de búsqueda principal.' The main content area features the NBER logo and the text 'National Bureau of Economic Research' in large white letters. Below this, it says 'Conducting and disseminating non-partisan economic research'. There are two buttons: 'Business Cycle Dating Information' and 'New This Week / Working Papers'.

# Paso #4

Visualización de los distintos resultados

The screenshot shows the NBER search results page for the keyword 'inflation'. The search bar at the top contains the word 'inflation' and a magnifying glass icon. An orange arrow points from a callout box on the right that says 'Palabra clave utilizada en la búsqueda' to the search bar. Below the search bar, it says '1 TO 50 OF 13569 RESULTS FOUND' and 'SORT BY: Relevance / Date'. The first result is titled 'Does Inflation Targeting Make a Difference?' and is dated 'JANUARY 30TH, 2007 - WORKING PAPER 12876'. The author is 'FREDERIC S. MISHKIN & KLAUS SCHMIDT-HEBBEL'. The second result is titled 'Inflation Forecast Targeting: Implementing and Monitoring Inflation Targets' and is dated 'OCTOBER 1ST, 1996 - WORKING PAPER 5797'. The author is 'LARS E. O. SVENSSON'. On the right side, there is a 'Filter Your Results' sidebar with various filters like 'Topics', 'Author & Editor', 'Content Type', 'Programs', 'Working Groups', and 'Projects'. An orange arrow points from a callout box on the left that says '# de resultados encontrados' to the '1 TO 50 OF 13569 RESULTS FOUND' text. At the bottom right of the sidebar, there is an upward-pointing arrow icon.

## Inflation Forecast Targeting: Implementing and Monitoring Inflation Targets

OCTOBER 15TH, 1996 - WORKING PAPER [5797](#)  
AUTHOR(S) - [LARS E. O. SVENSSON](#)

Inflation targeting is shown to imply inflation forecast targeting: the central bank's inflation forecast becomes an explicit intermediate target. Inflation forecast targeting simplifies both implementation and monitoring of monetary policy. The weight on output stabilization determines how quickly

WORKING PAPER 12876 DOI 10.3386/w12876 ISSUE DATE January 2007

Yes, as inferred from panel evidence for inflation-targeting countries and a control group of high-achieving industrial countries that do not target inflation. Our evidence suggests that inflation targeting helps countries achieve lower inflation in the long run, have smaller inflation response to oil price and exchange rate shocks, strengthen monetary policy independence, improve monetary policy efficiency, and obtain inflation outcomes closer to target levels. Some benefits of inflation targeting are larger when inflation targeters have achieved disinflation and are able to make their inflation targets stationary. Despite these favorable results for inflation targeting, our evidence generally does not suggest that countries that adopt inflation targeting have attained better monetary policy performance relative to our control group of highly successful non-inflation targeters. However, inflation targeting does seem to help all country groups to move toward performance of the control group. The performance attained by industrial-country inflation targeters generally dominates performance of emerging-economy inflation targeters and is similar to that of industrial non-inflation targeting countries.
